

## **AQUA HEALTH in association with Gauteng Environmental Services**

### **BUGCLEAR**

**BUGCLEAR** was specially developed for the control of flies, fruit flies, moths, ants and cockroaches. **BUGCLEAR** is environmentally friendly and safe for humans, animals and plants. **BUGCLEAR** can be used in many applications.

### **General Working**

The **BUGCLEAR** will not kill the insects in the fully developed phase but will sterilize all the eggs and larva. Thus the second cycle will never activate. This makes the product a highly effective but totally safe product for humans, animals(Birds) and plants.

### **General Application**

- ◆ Control of flies, fruit flies, moths, ants and cockroaches

### **Dosing Method**

- ◆ Product can be applied with a spray bottle to emit a fine mist.
- ◆ Product can be sprayed with a back-sprayer
