

AQUA HEALTH in association with Gauteng Environmental Services

OILCAP

OILCAP is the Environmentally Safe and Friendly way to clean up oils and oil spills. **OILCAP** is the best way to remediate soils contaminated by oils, diesel, petrol and other petroleum hydrocarbons.

APPLICATIONS

- **OILCAP** removes oil, diesel, petrol, paraffin from roads, bricks and concrete fast and efficiently
- **OILCAP** removes transformer oils from transformers and concrete plinths
- **OILCAP** remediates hydrocarbon contaminated soil and sand
- **OILCAP** remediates railway lines contaminated by oil and diesel
- **OILCAP** release ammonia from all surfaces
- **OILCAP** neutralise acids
- **OILCAP** encapsulate PCB's
- **OILCAP** encapsulates MTBE's

APPROVALS

- ⇒ USA Health department
- ⇒ USA Federal Health Department
- ⇒ EEC – European Economic Community
- ⇒ Has been approved by the EPA – Environmental Protection Agency

CHARACTERISTICS

- ⇒ Environmentally safe to use
- ⇒ Non-Toxic
- ⇒ Odourless
- ⇒ Non-Combustible
- ⇒ Fire retardant
- ⇒ Soil remediation can be done in-situ and does not have to be hauled away for treatment
