

AQUA HEALTH in association with Gauteng Environmental Services

POSTREAT

POSTREAT was specially developed for the post harvest treatment of flowers. *POSTREAT* is totally safe to use and is environmentally friendly. *POSTREAT* can be used in many applications.

General Working

POSTREAT will sterilize freshly cut flowers. This will enhance the quality of the flowers. *POSTREAT* will also prevent the stems from contamination by bacteria and fungus thus prolonging the shelf life of the flowers.

General Use

POSTREAT is a sterilizing agent. *POSTREAT* will enhance the shelf life of the plants and flowers.

Dosing Method

Add *POSTREAT* to the water where the flowers are kept
Spray *POSTREAT* with a spray mister on the flowers

Dilutions

For applying through the use of sprayers – 1 : 500 or 10 ml per 25 litre
For use in buckets – 40ml : 20 l
