

AQUA HEALTH in association with Gauteng Environmental Services

STERIPLANT

STERIPLANT was specially developed for the treatment of plants with stemrot and root rot. **STERIPLANT** is environmentally friendly and safe for humans, animals and plants.

STERIPLANT can be used in many applications.

General Working

STERIPLANT will not harm anything else but the bacteria that are responsible for stemrot and root rot. This makes the product a highly effective but totally safe product for humans, animals and plants.

General Application

- ◆ Cure and prevent plants from getting stemrot and root rot.

Dosing Method

- ◆ Product can be added to irrigation water
- ◆ Product can be added directly onto the plant stem and around
- ◆ Product can be applied with a spray bottle to emit a fine mist
- ◆ Product can be sprayed with a back-sprayer

Dilutions

- ◆ For adding to irrigation water – 1 : 10 000
- ◆ For spraying with a spray bottle- 1 : 5000 – Direct mist to the stem and roots, not on the flower or the leaves.
- ◆ For spraying with a back-sprayer- 1 : 5000 – Direct mist to the stem and roots, not on the flower or the leaves.
